

XPRESS 5 FINGER LED LAMP

– MANUAL GUIDE –

PLEASE READ ALL THE SAFETY INSTRUCTIONS BEFORE THE DEVICE OPERATION.
KEEP THE MANUAL GUIDE SAFE FOR FUTURE REFERENCE.

PRODUCT INTRODUCTION

The XPRESS 5 Finger LED Lamp is used for the LED UV light curing artificial nail substances consolidation.

SPECIFICATION:

| XPRESS 5 FINGER LED LAMP | ADAPTER: |
|--------------------------|--------------------------|
| DC Voltage: 12V | AC Voltage (V): 100-240V |
| Power: 6W±10% | Amperage (A): 0.46A |
| Amperage: 0.8A | Frequency (Hz): 50/60Hz |
| Weight: 141g | |
| Measure: 195*40*65mm | |

OPERATION

ATTENTION! Before the device operation, check the device and its accessories (adapter, power cord) just state.

- [1.] Unpack the device from the packaging.
- [2.] Choose a suitable, stable place for the device usage.
- [3.] After the device setting, connect the adapter to the device and to the outlet as well.
- [4.] Adjust the desired operating time in the front of the device. The device can be operated with 30sec and 60sec.
- [5.] After the time setting, put the Device into operation with the ON/OFF switcher on the front of the machine.
- [6.] When the operation has finished, the device will automatically turn off without sound indication.
- [7.] When the work is finished, pull out the adapter from the device and the outlet as well.

Notice: The device LED UV bulb holder can be turned backward max. 180°. Not future more. Because of the frequency difference, it may occur that certain artificial nail substances can act differently to the device LED UV light compared to the traditional type of UV light equipment.

CLEANING/MAINTENANCE AND STORAGE

ATTENTION! Before the cleaning/maintenance always anneal the device (turn off the machine, than remove the adapter from the device and from the AC outlet as well), as well as wait for the machine full cool down! Pay attention DO NOT touch the device LED bulbs with anything, use only compressed air and brush for the bulbs cleaning. It is recommended to wear gloves during in cleaning/maintenance procedure.

DEVICE and LIGHT SOURCE: For the XPRESS 5 Finger LED Lamp cleaning/maintenance use compressed air, brush and a non-synthetic soft cloth. DO NOT Disassemble the device! Wipe out the device external panel with the soft, dry cloth (DO NOT touch the LED bulbs), than reverse the LED Bulb holder and clean the bulbs with brush and compressed air. For the hard to reach parts cleaning (switcher, adapter socket, joints) use brush and compressed air. Finally wipe the device with the soft, dry cloth.
